Forskningsprofil

My research focus on understanding and predicting the broad-scale geographical variation and changing pat-terns of vector-borne and parasitic diseases, with special emphasis on tick, mosquito and snail-borne diseases using a One Health approach. I use a mix of theory and tools from ecology, epidemiology and global change biology. I am particularly interested in disentangling the role of climate change for zoonotic and vector-borne parasitic diseases, relative to other known environmental, ecological and social drivers.

Ansættelser

01/2021- current: Associate Professor, Section for Parasitology and Aquatic Diseases, Department of Veterinary and Animals Science, UCPH
01/2020-12/2020 Senior researcher, Section for Parasitology and Aquatic Diseases, Department of Veterinary and Animals Science, UCPH
01/2017-12/2019 Assistant Professor/Head of the Research Platform for Disease Ecology, Climate and Health, Center for Macroecology, Evolution and Climate (CMEC), GLOBE Institute, UCPH.
07/2014-12/2016 Assistant Professor in Disease Ecology, CMEC, The Natural History Museum of Denmark, UCPH (periods: 07/2014-06/2015 + 09/2015-12/2016).
05/2011-06/2014 Postdoctoral researcher in "Macroecology of Vector-borne disease", under the Programme of Excellence, Department of Biology, Faculty of Science, UCPH.
06/2005-05/2006 Research assistant, The Danish Bilharziasis Laboratory. Main tasks: Aquatic snail specimen collection curating and digitization, external consultancy for the IUCN Freshwater Biodiversity Assessment programme, Liaison Officer, Danmarks Akvarium.

Research management and leadership

10/2021-08/2025: Coordinator (PI) PREPARE4VBD – A Cross-Disciplinary Alliance to Identify, PREDict and prePARE for Emerging Vector-Borne Diseases, 4yr EU Horizon 2020 funded RIA project, 11 partners (total budget 6 mill EUR).

09/2020-06/2024: PI Changing Patterns of Vectors and Vectorborne Diseases, 4 yr. research project funded by Knud Højgaards Fond) (total budget 2 mill DKK).

01/2020: WP leader, DANIDA/FFU funded project: Predicting vector-borne disease epidemics: Dis-semination of risk

forecasting using DHIS2 in Tanzania (total budget: 12 mill. DKK).

01/2017-12/2019PI The Research Platform for Disease Ecology, Climate and Health (funded by Knud Højgaards Fond, total budget: 2.4 mill. DKK).

01/2017-06/2020Co-PI The Dragon 4 project: Forecasting vector-borne diseases by Earth Observation Data Mining. Project ID32260

06/2016Challenge of Science Leadership course, Barefoot Thinking Company, Plymouth, UK

01/2016- Associate editor, The International Journal of the Society for Geospatial Health.

01/2015-Executive Committee member, The International Society for Geospatial Health, Gnosis-gis.org.

05/2015-06/2016PI, research-project "Mapping snail-borne liver-flukes of wild deer populations in Gribskov" in collaboration with Naturstyrelsen, Denmark.

09/2012-12/2015Head of The Mandahl Barth Research Centre for Biodiversity and Health, (established in 2006).

03/2006-10/2010Workpackage leader, EU-FP6 project "CONTRAST" A multi-disciplinary Alliance to Optimize Schistosomiasis Control and Transmission Surveillance in Sub-Saharan Africa, counting 14 partners in 11 countries (total budget: €2.9 million). Responsible for WP to establish GIS-database on demographic, environmental, malacological, parasitological and socio-economic data for sub-Saharan Africa (now the GNTD.org database).

2006-: Workshop/symposium organizer: CONTRAST workshops in Uganda (2006), Cameroon (2007), Kenya (2010). Annual International Symposia for the International Society for Geo-spatial Health, Italy (2008;2010; 2011; 2013; 2014-2022); ICOPA 2022: Symposium "One Health and Schistosomiasis in a Changing World" and "Geospatial tools and methods in parasitology and spatial epidemiology" (the latter highlighted in the Lancet, (Frias, 2022. Highlights from ICOPA 2022; The Lancet Vol. 3(11) E813))

External funding and grants

2021-2025PREPARE4VBD – A Cross-Disciplinary Alliance to Identify, PREdict and prePARE for Emerging Vector-Borne Diseases, 4 yr EU Horizon 2020 funded RIA project, with a Consortium of 10 research and ministerial institutions from 8 countries in Europe and Africa (total budget 6 mill EUR). Role: Coordinator

2020 -2024Changing patterns of Vectors and Vectorborne diseases, Knud Højgaard Fund, (2 mill. DKK). Role: PI

2020-2025DANIDA FFU: Predicting vector-borne disease epidemics: Dissemination of risk forecasting using District Health Information Software2 in Tanzania. (PI: Prof. Michael Alifrangis, Center for Medical Parasitology, UCPH) (12 mill. DKK). Role: Co-PI and WP leader,

2019-2021Tracking swimmers itch parasites with eDNA. Augustinus Fonden (400.000 DKK). Role: PI

2021-2023Evaluation of Environmental DNA Technology for Detecting Schistosoma mansoni in Low Transmission Areas of the Caribbean. Ross University School of Veterinary Medicine Intramural Grant. PI: Arve Lee Willingham, RUSVM, co-PI Samson Mukaratirwa, RUSVM. Role: co-applicant and senior key personnel.

2017-2020The Research Platform for Disease Ecology, Climate and Health, University of Copenhagen, funded by Knud Højgaard Fund, (2.4 mill. DKK). Role PI.

2019EUopSTART funding to prepare stage 1 application for EUhorizon2020 call "C.[2020]: Vector-borne diseases in Africa (RIA)" (75.000 DKK). Role: Co-applicant, wrote the application.

2016-2020The Dragon 4 project ID32260 (Co-PI) (gives free access to satellite data from ESA and NRSCC to forecast vector-borne tropical diseases by Earth Observation Data Mining).

2014-2015Carlsberg Research Infrastructure Grant for snail-parasite microcosm experiments, Role: co-PI, wrote the application.

2009 Co-funding for own PhD-project personally procured, DHI –Water and Environment (500.000 DKK).

2009 Fieldwork grant, the Danish Bilharziasis Laboratory, Copenhagen Denmark (55.000 DKK).

2004WWF Verdensnaturfonden/Novo Nordisk Biodiversitetslegatet (21.008 DKK).
